SUMMARY

Computer Science undergraduate with hands-on experience in **cybersecurity, networking, backend systems, and security automation**. Built projects involving **vulnerability assessment, intrusion detection, authentication systems, PostgreSQL, and network traffic analysis**. Familiar with Linux environments, TCP/IP networking, and security testing workflows. Currently preparing for **CCNA** and focused on infrastructure and security-oriented engineering roles.

EDUCATION

- | | |
|--|---|
| • SRM Institute of Science and Technology
B.Tech in Computer Science (Cyber Security Specialization)
CGPA: 8.2/10 | Uttar Pradesh, India
Aug 2024 – Jul 2028 |
|--|---|

PROJECTS

VulneraScan – Automated Web Vulnerability Scanner GitHub Repository	2025
---	------

- Developed a Python-based vulnerability scanner capable of detecting **SQL Injection, XSS, Command Injection, insecure HTTP headers, SSL/TLS misconfigurations, exposed ports, and vulnerable services** using automated crawling and payload injection techniques.
- Integrated **Nmap-based port scanning, CVE mapping, parameter discovery, risk scoring, and automated report generation** to simulate real-world vulnerability assessment workflows.

Secure Quiz Platform with Anti-Cheat Mechanisms Live Link	2026
---	------

- Developed a full-stack quiz platform using **Next.js, PostgreSQL, Prisma, and NextAuth** with secure authentication, role-based access control, and scalable backend architecture.
- Implemented **anti-cheat systems including tab-switch detection, fullscreen monitoring, timer restrictions, suspicious activity tracking, password hashing, and secure result management workflows**.

CERTIFICATIONS & TRAINING

- **CCNA (Cisco Certified Network Associate)** – Currently Preparing
- **Cyber Security Bootcamp** – Udemy
- Hands-on practice with **Metasploitable, Kali Linux, network scanning, vulnerability analysis, and TRY HACK ME labs**

ACHIEVEMENTS

- Cleared **Smart India Hackathon (SIH) 2025 Internal Round** with blockchain-based traceability solution.
- Ranked among the **Top 20 teams** out of 300+ participants at Hackstasy Hackathon.

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, SQL, Solidity

Cybersecurity & Networking: Vulnerability Assessment, Network Security, Web Security, Intrusion Detection, TCP/IP, OSI Model, HTTP/HTTPS, Basic Cryptography

Security Tools: Nmap, Wireshark, Burp Suite, Metasploit, Hydra, Scapy

Frameworks & Technologies: Next.js, React.js, Flask, Node.js, Prisma, TailwindCSS

Databases: PostgreSQL, MongoDB

Platforms: Linux, Kali Linux, Git, GitHub

Core CS Concepts: OOP, DBMS, DSA, Operating Systems, Computer Networks
