SUMMARY

Cybersecurity-focused CS undergraduate with hands-on experience building **security automation tools, web vulnerability scanners, and secure full-stack systems**. Engineered an automated scanner covering 7+ attack vectors with CVE mapping and risk scoring, and delivered production platforms for freelance clients. Targeting **SOC analyst, security engineering, and infrastructure/IT roles**.

EDUCATION

- | | |
|--|---|
| SRM Institute of Science and Technology
B.Tech in Computer Science (Cyber Security Specialization)
CGPA: 8.2/10 | Uttar Pradesh, India
Aug 2024 – Jul 2028 |
|--|---|

EXPERIENCE

Freelance Full-Stack Developer 2025 – Present

- Built a full-stack **placement consultancy platform** with multi-step onboarding, candidate dashboard, and admin panel using **Next.js, NeonDB, Prisma, and NextAuth**; delivered end-to-end for a client.
- Developed a **business website for an interior design firm** with Sanity CMS, Next.js 14, and TailwindCSS, enabling the client to manage portfolio, services, and content without developer involvement.

PROJECTS

VulneraScan – Automated Web Vulnerability Scanner 2025
GitHub

- Engineered a Python scanner detecting **7+ vulnerability classes** (SQLi, XSS, Command Injection, SSL/TLS misconfigs, insecure headers, exposed ports) via automated crawling and payload injection across discovered parameters.
- Integrated **Nmap port scanning, CVE mapping, risk scoring, and PDF report generation** to replicate a real-world VA workflow end-to-end.

Quizzkr – Secure Quiz Platform 2026
Live

- Built a full-stack platform (Next.js, PostgreSQL, Prisma, NextAuth) with **role-based access control, session security, and bcrypt password hashing** serving authenticated exam sessions.
- Implemented **behavioral anti-cheat monitoring**: tab-switch detection, fullscreen enforcement, timer controls, and suspicious activity logging with real-time flagging.

CERTIFICATIONS & TRAINING

- CCNA (Cisco Certified Network Associate)** – In Progress
- TryHackMe SOC Analyst
- Hands-on practice with **Metasploitable, Kali Linux, Burp Suite, Nmap, Metasploit, and Wireshark**

ACHIEVEMENTS

- Cleared **Smart India Hackathon (SIH) 2025 Internal Round** with a blockchain-based supply chain traceability solution.
- Ranked **Top 20 out of 300+ teams** at Hackstasy Hackathon.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, SQL, Solidity

Cybersecurity: Vulnerability Assessment, SIEM, Incident Response, MITRE ATT&CK, Intrusion Detection, Web Security, Network Security, Basic Cryptography

Security Tools: Nmap, Wireshark, Burp Suite, Metasploit, Hydra, Scapy

Dev Stack: Next.js, Node.js, FastAPI, LangChain, Prisma, PostgreSQL, MongoDB, TailwindCSS

Platforms & Concepts: Linux, Kali Linux, Git, TCP/IP, OSI Model, OOP, DBMS, OS, Computer Networks
